

The Fascia Place

aluminium windows and doors made easy

Creating the future of aluminium glazing

The Fascia Place are working together with Fenster Fabrications to supply high end aluminium solutions for trade and commercial customers. We offer a bespoke design service and ensure that everything we produce is of the same outstanding quality.

Having amassed a wealth of industry knowledge and experience we work with many leading traders and system houses across the South of England to create high performing, slim-line, and durable, Smarts architectural aluminium products.

The Fascia Place have joined forces with Fenster Fabrications to design, manufacture and supply, high quality aluminium windows and doors throughout the South of England

with a vision to create visually stunning, and harmonious product suites that are built to last, and deliver exceptional long-term value.

With a focus on style and performance, our reputation is upheld by some of the most creative projects to be seen anywhere in the South. Our combined skill and design expertise are perfectly showcased by stunning facades which have been designed for both Commercial and Residential installations."

Sliding and folding doors

Visofold 1000 Plus
Visoglide Plus

Visofold 1000 Plus

The Visofold series of slide-folding doors offer impressive opening apertures that can unite internal and external areas creating unique living and social areas. Suitable for both residential and commercial applications.

Visofold doors are available in a choice of standard or non-standard colours, including metallic, wood-structure, dual colour and the unique Sensations range of textured finishes.

Visofold can be used in domestic applications as either an alternative to sliding doors, or to open up an entire wall as part of a conservatory; the system will make the most of a beautiful view or bring a garden into the home.

Used commercially in a bar, café or restaurant, Visofold can create a glazed screen that allows the maximum

ingress of light in inclement weather, and will also easily glide to open up an entire wall in warmer weather. Visofold doors offer a choice of opening configurations to suit any application. Choose to fold the sashes internally or externally, place the opening at the side so the sashes all fold one way, at one end, to create a single entrance door for easy access, or in the middle to give the option of a double door.

All Visofold profiles feature a polyamide thermal break that enhances the thermal performance of the profile and improves the overall U-Value. Profiles feature EPDM high quality gaskets and weather brushes to aid weather resistance. Visofold complies with the requirements of Building Regulations Document L 2010. Security is assured by multi-point lock mechanisms on main opening sashes, and shoot-bolt locking on floating mullions.

All Visofold doors have the option of either low thresholds for unimpeded, easy access, or rebated thresholds that offer improved weather resistance.

Visoglide Plus

Combining the benefits of a large picture window, which allows light to flood in to an internal space, with an easy opening operation, Visoglide Plus is a high quality, highly versatile system which is a great option for even the largest project. Delivering outstanding thermal efficiency, Visoglide Plus offers contemporary styling and robust performance, with the option of slide, or lift and slide operation on double or triple tracks.

Visoglide Plus profiles have been designed to improve both strength and weather resistance.

This adaptable system is suitable for use as either sliding commercial entrances where large opening apertures are required, or as dynamic residential sliding doors that maximise light and give stunning unimpeded views.

Visoglide Plus profiles have been designed to improve both strength and weather resistance. All main sections

feature an extended polyamide thermal break that allows Visoglide Plus to achieve a U Value of 1.6 W/m²K when installed with a suitable sealed unit.

Visoglide Plus doors are available in both single and dual colour in wide choice of standard and non-standard finishes including the unique Sensations range of textured colours.

Window and door systems

Alitherm
Heritage
ECO Futural

Alitherm

Alitherm windows and doors have been designed to reduce heat loss by the use of a thermally broken aluminium frame with a polyamide bridge. The polyamide material has a very high resistance to heat transfer from the inner face of a frame to the external face of a frame. The thermally broken frames provide homeowners with windows and doors with elegant slim sightlines, and strength and durability.

Designed to conserve warmth and energy, bringing comfort and style that suits any home.

The Alitherm range of windows and doors offers all you would expect from a quality system – greater comfort, better insulation, minimal maintenance, aesthetically pleasing appearance and enhanced security. In short, the Alitherm product range offers you peace of mind but even more it represents a sound investment in your property.

Whatever your taste or style of home, we can offer distinctive window designs to suit. Our unique style of

windows are available in a choice of finishes and colours externally including luxurious mahogany and rich golden oak as well as a white finish internally.

Our handsome range of entrance doors will impress your guests and keep out both the elements and unwelcome intruders. Our Alitherm doors are designed for use as open out or open in, single or double doors, internally or externally beaded with side-light and low threshold options.

Heritage

A range specifically designed to meet the requirements of refurbishment and renewal projects, particularly in sensitive planning areas. Ideal for Victorian and Art Deco projects, the range of commercial and residential windows and balcony doors are already proven in a wide range of renovation, refurbishment and heritage projects across the UK.

The perfect solution for sensitive refurbishment and renovation projects, with slim profiles and sightlines ideal for listed buildings.

The Heritage door and window ranges both feature the slim profiles and sight lines that are associated with traditional steel doors and windows.

However, the systems' timeless elegance is also accompanied by the outstanding thermal performance of a modern aluminium system – each delivering a 'B' Energy Rating.

Featuring slim, thermally-broken profiles, Heritage windows are available in a number of formats, including fixed-pane, top & side-hung casement, pivot and tilt and turn.

These different options may be installed in a combination of horizontal modules, which are stacked using our coupling options to form a multi-part window. Both the window and door systems deliver a U-Value of 1.5 W/m²K, when installed with a suitable sealed unit, and are available in either single or dual polyester powder coated finishes.

There is a full suite of hardware options, specifically designed to match the door and window furniture that is synonymous with Victorian and Art Deco styles.

ECO Futural

EcoFutural is a versatile range of high performance commercial windows suitable for use as tilt turn, pivot casement, fixed and open out casement windows.

Windows suitable for all commercial, retail, residential, public, healthcare, educational applications.

All EcoFutural profiles utilise chambered polyamide thermal break technology which creates a barrier between the cold air outside and the warm air inside. This technology significantly reduces thermal transmittance and enhances the overall U Value of a product.

EcoFutural products are available in a choice of standard or non-standard colours, including metallic, dual colour, textured Sensations and Alchemy anodised effect finishes.
