Beautiful blinds and shutters for your home

Add the perfect finishing touch to your VELUX roof windows with VELUX blinds and shutters. Whether you want to soften incoming light or block it out, our large range of interior blinds can offer you the perfect solution. If it's heat control you are looking for, take a look at our external awnings and shutters range.

Use our easy 5 step ordering and installation guide on page 10, select the right blind for you, and order direct from us at [veluxblindsdirect.co.uk](https://www.veluxblindsdirect.co.uk).

Just a Pick&Click!™ away

All our VELUX blinds feature the unique Pick&Click!™ mounting system. This patented VELUX installation method means they can be fitted in minutes. No matter what type of VELUX roof window you have – large or small, old or new – all our blinds will fit flawlessly every time.

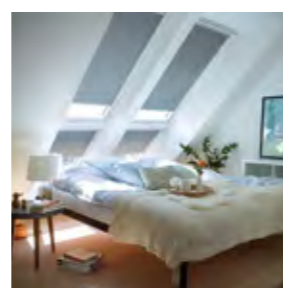

Safety and security

The **child-safe cordless design*** featured in VELUX blinds eliminates dangling cords to improve safety in the home. **OEKO-TEX®** certified textiles on blackout blinds ensure no harmful substances are used.

The best roof windows, the right blinds and shutters

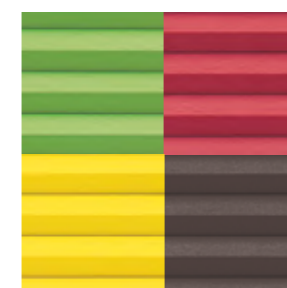

We manufacture the largest range of roof window blinds and shutters on the market, so you'll be spoilt for choice. VELUX blinds and shutters are made especially for VELUX roof windows. They're easy to fit and made for long-lasting and reliable performance.

* All VELUX internal blinds are power operated or cordless operated and fulfil the safety in use requirements in EN 13120:2009+A1:2014 and EN 60335-2-97:2006+EN 60335-2-97:2006/A12:2015

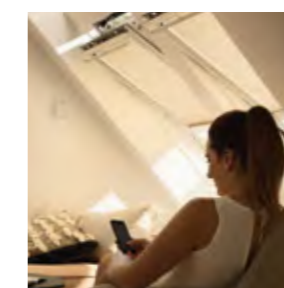

The perfect blind for you

Controlling the amount of warmth and daylight in your home is key for enjoying your ideal environment and optimum comfort. Your VELUX blinds are an important part of getting your indoor climate just right, giving you more flexibility and control over heat and light. From keeping your bedroom warm on chilly nights, to stopping your extension getting too warm on a sunny day.

A rainbow of colours

Whether you need light control, heat protection, a sophisticated look or a splash of colour, you are sure to find the right blind for your needs. Simply choose from our wide range of blinds and select a colour or pattern that complements your room. From hidden cords and slim designs and OEKO-TEX® fabrics, our blinds have quality built in.

Comfort and convenience

You can choose from manual, electric or solar powered operation. Electric blinds are for VELUX INTEGRA® electric roof windows and solar blinds are for solar or manual roof windows.

Smart indoor climate control

With smart, sensor-based operation, VELUX ACTIVE works together with your VELUX INTEGRA® electric or solar roof windows, blinds and shutters.

See page 9 for details.

It's all in the details

Our high performance, award-winning blinds and shutters are built to last. They are rigorously tested to ensure flawless operation even after years of everyday use and exposure to the elements. For generations, VELUX engineers and designers have been perfecting our products and patented solutions. That's why VELUX blinds and shutters are the best choice for your VELUX roof windows.

Reduce heat intake
by up to 76% with a VELUX awning blind*

External blinds and shutters

Awning blinds

- VELUX awning blinds control how much heat and light enters your home.

Roller shutters

- Roller blinds can be used to keep out the cold.
- Offers total blackout of daylight, reducing solar heating by up to 94%.

See how you can control your indoor climate automatically on page 9

Internal blinds

Blackout

- Blackout your bedroom for a great night's sleep. Choose blackout energy blinds to reduce heat loss by up to 25%*.

Light adjustment

- Diffuse daylight rather than black it out completely. Choose VELUX roller blinds as a simple, stylish solution to soften incoming light and achieve basic privacy.

Improve insulation
by up to 25% with VELUX blackout energy blinds*

VELUX awning blinds block heat from the sun's rays before they hit the pane.

Improving your home's indoor climate

Your VELUX roof windows bring warmth and light into your home. Controlling these elements with the help of VELUX blinds and shutters is key to achieving an ideal indoor climate.

VELUX blinds and shutters provide extra insulation, daylight control and heat protection. In this way they can reduce your home's energy consumption by minimising heat loss during the winter and heat gain on a hot, sunny day. With VELUX INTEGRA® solar or electric powered operation, you get the added convenience of a remote control to open and close easily.

Protect your home against the heat

Passive heating from the sun is a major benefit on a cold day, but can lead to overheating in warmer months. VELUX roller shutters can reduce the heat impact of the sun by up to 94%.

Protect your home against heat loss

Although VELUX roof windows are well insulated, interior VELUX blackout energy blinds can further reduce heat loss by up to 25%. This extra insulation is especially important on a chilly night during the winter months.

* The technical values of various accessories are determined through standardized tests and calculations, all in compliance with the international standards EN ISO 12567-2, EN 13363-2 and ISO 15099. Effect depends on type of roof window and glazing.

Please note that when blinds are rolled down the risk of condensation is increased. Therefore rolling up the blind after use and ventilating regularly is recommended.

VELUX INTEGRA® electric and solar blinds and shutters

NEW! VELUX ACTIVE For a smarter healthier home.

90% of our time is spent inside, so maintaining a good indoor environment is more important than ever. We have partnered with revolutionary smart home company NETATMO to bring you a brand new way to control your home's indoor climate.

Smart sensors measure temperature, CO₂ and humidity levels, then the system reacts to operate your VELUX INTEGRA® products – adjusting them automatically to provide the right level of ventilation, light and heat. VELUX ACTIVE is the smarter way to achieve a healthier indoor climate.

Sensor-based ventilation

Smart sensors monitor temperature, humidity and CO₂ levels and operate your roof windows accordingly for a healthier indoor climate.

Smart heat protection

Proactively closes any VELUX INTEGRA® shutters and awnings based on local weather forecast information, e.g. an increase in temperature.

Easy installation

You can easily set up and install VELUX ACTIVE without any professional assistance.

VELUX ACTIVE

Smart sensor-based operation of your VELUX INTEGRA® skylights and blinds.

Power with the grid or the sun

VELUX INTEGRA® electric and solar blinds and shutters use mains or wireless solar power to give you remote control.

VELUX INTEGRA® electric blinds and shutters are designed to work with VELUX INTEGRA® electric roof windows.

VELUX INTEGRA® solar blinds and shutters are designed to work with solar and manually operated VELUX roof windows.

* Technical values are in compliance with EN ISO 12567-2, EN 13363-2 and ISO 15099. Effect depends on type of window and glazing.

How to select and install your blinds

Selecting your VELUX blinds and shutters is easy. Just follow our simple five step process to get the perfect solution for you.

1

Find your window type and size

When you open your VELUX roof window you will find a data plate on top, either on the right or left hand side. Data plates differ in appearance depending on the age of your VELUX roof window.

Find yours from the examples to the right. This will give you the correct type and size of your window model.

From 2014 Type Size

2002-2013

1992-2001

Before 1992

2

Select your blind type

You can choose an interior and/or exterior VELUX blind or shutter that meets your needs including blackout, light adjustment, heat control, or insect protection. Once you've selected your blind, see the relevant product pages for the code and price.

Blackout				Light adjustment				External heat protection		Insect protection	
	Blackout	Duo blackout	*Blackout/ Light-dimming energy	Children's collection	Roller	*Pleated	Venetian	Roman	*Awning	Roller shutter	Insect screen
											
Heat protection											
Blackout											
Light adjustment											
Safety											
Insulation											
Privacy											
Noise reduction											
Insect protection											

* Also available for VELUX flat roof windows

  Basic performance   High performance   Superior performance

3

Select operation method

There are three operation methods to choose from. Manual blinds are a good option when your roof windows are within reach, while our electric or solar powered blinds are ideal for out-of-reach areas.

Blackout				Light adjustment				External heat protection		Insect protection	
	Blackout	Duo blackout	*Blackout/ Light-dimming energy	Children's collection	Roller	*Pleated	Venetian	Roman	*Awning	Roller shutter	Insect screen

The right light in your living space

Pleated blinds

VELUX pleated blinds are an elegant way to provide privacy whilst bathing your room in a pleasant, soft light. They can be positioned anywhere on the roof window and can be controlled from the top and bottom so you can adjust the amount of light coming in while still enjoying the outside view.

- **Total flexibility**
Manually operated flying pleated blinds can be adjusted from the top and bottom of your VELUX roof window, allowing you to block direct sunlight while allowing in softly diffused daylight at the same time. Perfect for a home office filled with natural daylight.
- **Manage daylight in out-of-reach areas**
Choose VELUX INTEGRA® electric or solar pleated blinds and diffuse sunlight at the touch of a button. Designed to work with your VELUX INTEGRA® roof windows, these blinds are perfect for out-of-reach areas such as a living room or dining room extension.

Pleated blinds

A home office that works

Venetian blinds

VELUX roof windows fill any room with natural light and fresh air. The extra daylight gives the room a more open, spacious feel and these high moisture areas benefit from added ventilation. As privacy is just as important as sunshine in the bathroom, VELUX Venetian blinds are an ideal addition.

Order your
VELUX blinds and
shutters online at
veluxblindsdirect.co.uk

- **Cordless operation**
Manually operated Venetian blinds are very easy to use. Unlike traditional venetian blinds, the VELUX Venetian blind is cordless. You therefore adjust the blind using a control bar attached to the bottom of the blind.
- **Moisture resistant and easy-to-clean**
These moisture resistant and cordless controlled blinds are easy-to-clean and come in 9 different colours to suit your personal style and decor.
- **Privacy and style**
With VELUX Venetian blinds you can have both privacy and light. Just tilt the slats in any direction to adjust the angle of the light and achieve the right amount of privacy.

Venetian blinds

Your personal oasis

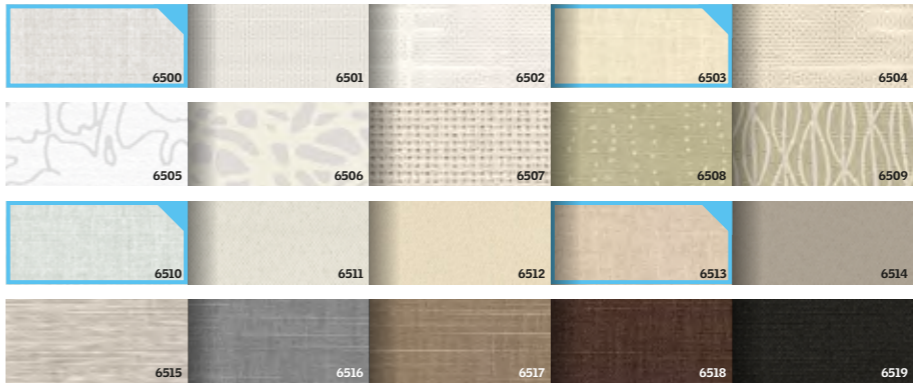

Roman blinds

Get ready to enjoy a wide range of decorative solutions with VELUX Roman blinds. Explore the potential of beautiful fabrics and be inspired by the soft styling effects that make this collection refined and original. Should you want to add more personality to your home office, VELUX Roman blinds come in a variety of colours and patterns.

Keep your options open with a blind you can easily swap over in a matter of minutes.

- **Versatile**
The clever design of our Roman blinds mean you can easily swap the fabric in a matter of minutes – a perfect and easy way to update the room’s interior.
- **Soft lighting effects**
With flexible and stepless positioning, block direct sunlight and give your room a gentle glow as the Roman blinds softly diffuse light into the room.

Roman blinds

Versatile and stylish

Awnings and shutters

You can add twice the daylight* to your extension by combining VELUX roof windows with vertical glazing such as bi-fold doors. With all this added daylight however, it's important to be able to protect your space from added heat from the sun. Take a look at our exterior heat protection sun screening products to help add comfort to your home.

Combine any external awning blind or roller shutter with an internal VELUX blind see pages 16-33

Awning blinds

For a cool summer room, VELUX awning blinds provide solar heat reduction whilst ensuring you can maintain the view through your roof window.

- **Sun yes, heat no**
Reduce heat by up to 76%.
- **Quality**
Weather resistant fabric for longer lasting performance.
- **Easy installation**
Install from the inside in minutes.

Awning blind

VELUX ACTIVE compatible

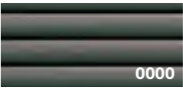

Roller shutters

From full daylight to complete blackout, VELUX roller shutters offer you additional energy saving and noise reduction.

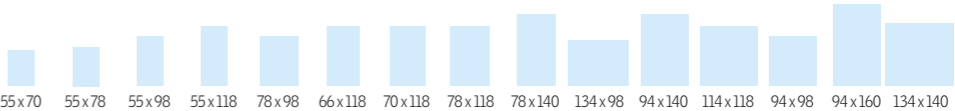

- **Complete light control**
Keeps out the light and prevents overheating.
- **Energy saving**
Provides insulation in cold weather.
- **Security and noise reduction**
Provides additional security and protection from the elements.

Awnings and shutters

Exterior blinds for heat protection

Electrically powered products combined with a manual VELUX roof window require a control unit KUX 110.

- ▶ All awnings and shutters have a delivery time of up to 7 days (except electric and solar shutters in size 5 and CK01 which are 15 days).
 - ▶ Delivery time is in working days from receipt of orders placed before 4pm (UK) and 3pm (NI).
- *VELUX roller shutter SHL is only compatible with VELUX roof windows produced after 2002.

Flat roof sunscreening

To control the amount of incoming light or to reduce the indoor temperature in the summer – there are some great options to complete your VELUX flat roof window.

Pleated blind

Perfect for softening incoming daylight and adding a decorative touch, pleated blinds open and close with a handy remote control. They are available in three colours, white (1016), classic sand (1259) and metallic blue (1265).

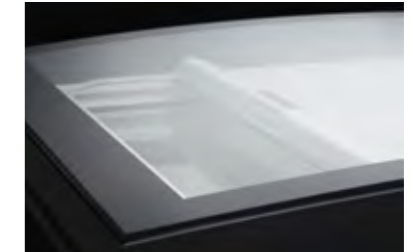

- Softly diffuses incoming light.
- Enables complete privacy.

Light-dimming energy blind

The light-dimming, double-pleated blind with aluminium coating between the cloth layers improves insulation and increases indoor comfort. The remote controlled electric (FMK) or solar (FSK) blind is available in two colours, black (1047) and white (1045). Please note that the solar blind is suitable for flat roof windows with a clear dome only.

- Blackout effect.
- Protects against cold from the outside.
- Enables complete privacy.

Awning blind

Installed between the window and the dome, transparent awning blinds are solar powered and operated by remote control. They keep the indoor temperature comfortable by filtering the strong rays of the sun and provide effective heat protection by up to 77%. Awning blinds are compatible and easy to install.

- Reduces passive heating by up to 77%.
- Dims daylight and prevents direct glare.
- Enables complete privacy.

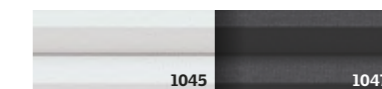

* MSG awning blind is not compatible with a VELUX flat glass rooflight.

Accessories

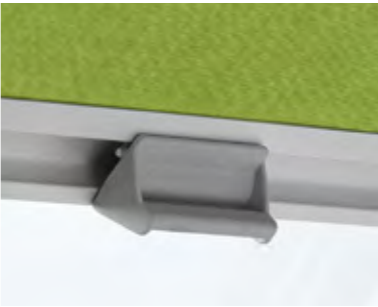

Pole Control ZCT 200

The VELUX telescopic pole makes it easy to manually operate centre-pivot roof windows or out-of-reach blinds when fitted with the correct adaptor. The pole extends from 100cm to 180cm.

Pole extension ZCT 100

100cm extension pole for the ZCT 200.

Pole Adaptors Z02 085

Pole adaptor for VELUX manual blinds that are out-of-reach. Use along with the pole control for simple operation.

Control Unit KUX 110

Control unit is for operation of an electrically operated blind on a manual roof window. The system consists of a control unit and a remote control.

Insect screening and accessories

VELUX insect screens let you enjoy fresh air – without the insects. They are simple to operate, and they fit any VELUX roof window. Insect screens stow neatly away in the slim aluminium top casing when not in use.

- 100% insect-proof net fabric.
- Durable, transparent fabric – does not obstruct your view.
- Improved visibility – lets you enjoy more daylight.
- Mesh ensures perfect airflow.

Please note: Insect screens are mounted on the wall and not the window frame. You therefore need to measure your window opening to get an insect screen in the correct size.
